

ARMA NOVA Chapter Webinar

Wed, March 25, 2026 11:30 AM – 1:00 PM EST

"AI IN RIM" WEBINAR SERIES, PART 3

AI GOVERNANCE: AN ACTIONABLE HOW-TO GUIDE

Joe Shepley, Senior Director, Triad Executive Advisors

AI in RIM Webinar Series

AI is here and, like everyone else, we have questions about how it will impact information and records management, and how we can make AI work for, and not against, us. We want to go beyond basic theory and explanation to tackle AI topics we believe answer the practical, real-world needs of records professionals. We'll bring in experts to give their views, experience, and actionable steps on what we can do now to get us, and IG/RIM, ready for the AI world. As Dan Beard, our chapter president says, we're past making the clay car, let's make a real one!

Part 3: Practical AI Governance

Given the rapid adoption of AI by organizations across all sectors, the question of how to govern it effectively is top of mind for Information Governance professionals. However, the slow pace of AI regulation combined with the sheer number of non-AI laws and regulations that touch on AI make implementing effective AI governance a challenge. In this third session of our series, Joe Shepley presents a step-by-step approach to building your AI Governance program in a practical, scalable way. From creating an inventory of your current AI systems and the business processes that leverage them, to developing a regulatory crosswalk to document the laws and regulations your organization is subject to, to defining the specific controls needed to govern AI effectively, you'll leave the session armed with what you need to help your organization get AI Governance right.

- 11:30 AM – 12 Noon ET – Networking
- 12 – 1 PM ET – Webinar and Discussion

No cost to register!

Joe Shepley, PhD, CIPP/US, AIGP

Joe Shepley is a Senior Director with Triad Executive Advisors in Chicago and leads their Governance and Advisory Practice (Compass). He specializes in information governance, including data privacy and AI Governance. With 25 years of experience, Joe has helped Fortune 1000 organizations build, operationalize, or modernize their information governance programs, evolve their records management capabilities, execute large-scale data cleanup efforts, stand up AI Governance programs, and revamp their policies, procedures, and other controls to support effective information governance—particularly in meeting the retention and disposal requirements of U.S. and global regulations, such as California's CPRA, the GDPR in the E.U., HIPAA, and NYDFS 500.13.

Joe earned a bachelor's degree in English, religious studies and philosophy from Connecticut College and a master's degree and a PhD in the history of Christianity from the University of Chicago. He is an AI Governance Professional (AIGP); a Certified Information Privacy Professional U.S. (CIPP/US); an Advisor for the Health Sector Coordinating Council Joint Working Group on Cyber; on the planning committee of the Western Energy Institute; and a member of the Sedona Conference Working Group on AI and the Law..
